

What is claimed is:

Subal  
5

1. An information handling system, comprising:  
a graphical user interface;  
wherein the graphical user interface is configured to display a channel list  
including at least one television channel and at least one internet channel concurrently.

10

2. The information handling system of claim 1, wherein the channel list is a  
favorite channels list.

3. The information handling system of claim 1, wherein the graphical user  
interface includes an electronic program guide configured to display the channel list.

15

4. The information handling system of claim 1, further comprising an electronic  
program database for storing the channel list.

20

5. The information handling system of claim 1, further comprising a convergence  
system which includes the information handling system.

Suba2

6. A computerized system for integrating internet sources into an electronic program database comprising:
- one or more television channels;
  - one or more internet channels;
  - 5 one or more channel lists integrating the television channels and the internet channels; and
  - a means for storing each one of the channel lists.
7. The computerized system of claim 6, further comprising a means for
- 10 displaying a selected one of the channel lists wherein each one of the channel lists contains one or more stored properties for the means for displaying.
8. The computerized system of claim 7, wherein at least one of the stored
- 15 properties relates to a graphical attribute of the means for displaying.
9. The computerized system of claim 7, wherein at least one of the stored
- properties relates to a behavioral attribute of the means for displaying.
10. The computerized system of claim 6, further comprising one or more user
- 20 interfaces providing a means for managing for each one of the channel lists.

11. The computerized system of claim 10, wherein the user interfaces provide a management function of selecting the channel list.

5 12. The computerized system of claim 10, wherein the user interfaces provide at least one of the management functions selected from the group consisting of: adding the television channel, adding the internet channel, removing the television channel, and removing the internet channel.

10 13. The computerized system of claim 10, wherein the graphical user interface is a channel banner graphical user interface.

14. The computerized system of claim 10, wherein the graphical user interface is a favorite channel list graphical user interface.

15. A computer-readable medium having computer-executable components comprising:

a database component for storing one or more channel lists, at least one of the channel lists integrating one or more television channels and one or more internet channels; and

20 a user interface component for displaying the channel lists.

16. The computer of claim 15, wherein the computer-readable medium comprises a memory.

5 17. A computer comprising:  
a processor;  
a computer-readable medium;  
a display device; and  
at least one application program, each application program executed by the  
processor from the computer readable medium to provide one or more channel lists for  
10 viewing on the display device wherein the channel lists integrate one or more television  
channels and one or more internet channels.

18. The computer of claim 17, wherein the computer-readable medium comprises  
~~a memory.~~

15  
*Subcat*  
19. A method of integrating sources in a convergence system, the method  
comprising the steps of:  
including at least one television channel and at least one internet channel  
concurrently in a channel list;  
20 storing the channel list in a database; and  
displaying on a display device the channel list.

20. An information handling system, comprising:

a graphical user interface;

5 wherein the graphical user interface is configured to display a channel list including at least one television channel and at least one internet channel concurrently, wherein the channel list includes graphical and behavioral attributes to determine the graphical user interface for the channel list when displayed in an electronic program guide.
